Submitted to **Proposed Guidelines for the Posthumous Use of Gametes, Reproductive Tissue and Stored Embryos**

Submitted on **2020-09-30 14:11:04**

Introduction: Seeking feedback on draft guidelines

Proposal A: All posthumous use should be subject to ECART review

1 Should ethical review by ECART be required for all posthumous uses of gametes or reproductive tissue, even if consent to specific use was given while the deceased person was alive?

No

Comments:

2 Should ethical review by ECART always be required for the posthumous use of stored embryos, even if consent to specific use was given while the deceased person was alive?

No

Comments:

3 Do you agree that ACART should recommend a change to the HART Order 2005 to ensure all posthumous use is considered by ECART?

Yes

Comments:

4 Do you agree that the guidelines should allow for the posthumous use of clinic donor sperm or eggs, if there is already a child from the person who donated those gametes and the new child will be in the same family?

Yes

Comments:

Does not matter have child before or not and if same family of different family. All that matter is able to allow that to happen and fulfill those wishes.

Proposal B: Consent must be for use by a specified person/s

5 Do you agree that the deceased person must have consented to a specific use?

No

Comments:

people usually don't think deeply ones they have studied the topic and seemed professional workshops .
people may not know all the possible specific ways options to them at that time while completing consents.

6 Do you agree with ACART, that the definition of specific use should mean "consent to use by a specific person/s"?

No

Comments:

as above ,They may mention what they are aware of but that does not mean they know all this options at that time.
As per the person they are just filing some forms of their will with lawyers . They may not have thought or anticipated things at given time and person may be anxious or excited or else.

Proposal C: Consent to use must be proven

7 Do you agree that the intending parent(s) must provide evidence of consent to posthumous use in order to use gametes, reproductive tissue or stored embryos from a deceased person?

Yes

Comments:

It is ironic parents have to prove what has been consented and earned by their loved one .
yes if in doubt of intentions of parents/ stepparents etc.!!! which is kind of weird.

Proposal D: Consent may be written or oral

8 Do you agree that oral consent is acceptable?

Yes

Comments:

9 Do you agree that there must be evidence of oral consent for that consent to be acceptable?

Yes

Comments:

Widen up the scope of verbal consent and validation by other people.

Proposal E: In most cases, the deceased's consent to retrieval can be inferred from their consent to posthumous use

10 Do you agree that consent to posthumous use of gametes or reproductive tissue can be taken to imply consent to posthumous retrieval of the gametes or tissue?

Yes

Comments:

11 Do you agree that there is no need to test whether the deceased person had a full understanding of the method of retrieval of the gametes or tissue?

No

Comments:

Proposal F: ECART or the High Court will be able to authorise the retrieval of gametes or reproductive tissue from a deceased person

12 Do you agree that ACART should recommend a change to the HART Order 2005 so that it is clear that posthumous retrieval is never an established procedure?

Yes

Comments:

13 Do you agree that, subject to the change to the HART Order 2005, ECART could authorise posthumous retrieval? (Note: This would seldom or never actually happen because retrieval cases would usually be decided by the High Court.)

Yes

Comments:

Proposal G: Prohibiting retrieval from deceased minors

14 Do you agree that the retrieval of gametes and reproductive tissue from deceased minors, for reproduction, should be prohibited?

No

Comments:

15 Do you agree that if a minor freezes gametes or reproductive tissue and dies before they can use those gametes or reproductive tissue (or can consent as an adult to another use), then the gametes or reproductive tissue are not able to be used by anyone else?

No

Comments:

Proposal H: One change to the HART Act to enable minors to choose the use of their own gametes/tissue after they reach the age of 16 years

16 Do you agree that ACART should provide advice to the Minister to amend section 12 of the HART Act 2004 to enable people to choose the use of their own gametes/tissue after they reach the age of 16 years?

Yes

Comments:

even before 16 say when they are 15 . if they make decision to have retrieval of gametes or sperms why can they be allowed to make decision about its usage. infact respect the wish to bring thier own offspring and allow whoso ever want to be medium to fulfill that decision wish or consent made any so called minor (15 yr old) but mature person .

Proposal I: No requirement for a specific stand-down period

17 Do you agree that there is no need for the guidelines to include a specific provision about a stand-down period?

Yes

Comments:

Facilitating this approval to utilise stored preserved tissues as soon as possible is much helpful and positive for parents siblings and other members.

18 Do you agree that the counselling provision (7.f), about allowing time for grieving, is adequate for ensuring people make a well-considered decision?

Yes

Comments:

Proposal J: No change for the gamete and embryo storage period

Proposal K: The title of these guidelines

19 Do you agree with the proposed title for the guidelines of Guidelines for the Posthumous Use of Gametes, Reproductive Tissue and Stored Embryos?

Yes

Comments:

Your details

What is your name?

Name:

██████

What is your email address?

Email:

████████████████████

If this feedback is on behalf of an organisation, please name the organisation and provide a brief description

Organisation name:

Organisation description:

Please explain your interest in this topic

Member of the public

If you selected Other, please provide more detail:

What is your gender?

Female

Would you like to make a verbal submission in person or using electronic communications?

No

Which of the following age groups do you belong to?

13-19 years

What is your ethnicity? (Tick all you identify with)

Asian
